**LONDON
CLINIC**

Fast appointments, specialist reporting, best patient experience

Located in the Duchess of Devonshire Wing, our priority when designing the 3T MRI suite was patient comfort. The scanner has a wider 70cm bore and offers customisable lighting and music options for a greater patient experience ensuring our patients feel at ease during their stay with us.

The London Clinic 3T MRI offers:

- Supporting speciality areas such as orthopaedics, musculoskeletal, oncology, breast, urology and neurology
- A higher spatial resolution, resulting in exceptional anatomic detail
- Scanning protocols are tailored to each patient
- BioMatrix technology improves the quality and reproducibility of scans and this helps to avoid rescanning
- Full free breathing during abdominal and cardiac exams
- High definition imaging of the prostate
- Detailed breast images to detect early changes
- Neuroradiology including spectroscopy, functional MRI, and angiography
